<b>Office Action Summary</b>	<b>Application No.</b> 10/718,991	<b>Applicant(s)</b> STOCKMAN ET AL.	
	<b>Examiner</b> Necholus Ogden	<b>Art Unit</b> 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3-17-2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 29-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allan et al (2001/0016566) in view of DeVitis (2003/0220212) or Dulin et al (5,221,506).

6. Allan et al disclose a process and apparatus for the production of a detergent composition, wherein said process of manufacturing a soap bar comprises injecting said soap material, usually in a molten or semi-solid form, under pressure into a mold (0058, 0073) and wherein said mold may comprise rigid or non-rigid materials (01124-0125) and comprises at least two die parts with a sealing means (0128-0129). Furthermore, the mold comprises a neck or short channel where the detergent composition may be delivered (0136) and separate holes or slits in the mold to allow for venting to facilitate air flow from the mold by vacuum (0143-0148).

7. Allan et al is silent with respect to including a scrubbing means or non-woven filamentous material.

8. DeVitis discloses a reinforced bar soap comprising a soap bar comprising a reinforcement member in the interior portion thereof and comprised of a mesh (0003) materials such as synthetic and natural fibers, sponges and wood. Also, said material may include polymers and other synthetic material (0007). See figure 1.

Art Unit: 1796

9. Dulin et al disclose a soap bar comprising a core insert material surrounded by soap and wherein said core material comprises a sponge or non-woven filamentary structure (claim 1 and figure 1).

10. It would have been obvious to one of ordinary skill in the art to include an abrasive or scrubbing material to the bar compositions of Allan et al because DeVitis or Dulin each teach the inclusion of said materials for added benefit to the user as exfoliants or bar reinforcements.

An obviousness determination is not the result of a rigid formula disassociated from the consideration of the facts of a case. Indeed, the common sense of those skilled in the art demonstrates why some combinations would have been obvious where others would not. See KSR Int'l Co. v. Teleflex Inc., 550 U.S. \_\_\_, 2007 WL 1237837, at \*12 (2007) ("The combination of familiar elements according to known methods is likely to be obvious when it does no more than yield predictable results.").
